

FLASH

800-Fill Goose Down | Men's

0°F
-18°C

Ultralight

Rated to 0 degrees with fixed side baffle construction, a Jacket Hood and dual draft tubes, the Flash takes on winter climbing, Alaskan backpacking or any cold-weather outing. Big insulation in a sub-three-pound bag.

INNOVATIONS

Jacket Hood

- Reduces the weight of the bag while still keeping the warmth
- Provides a fitted hood for better insulation and decreased heat loss

Foot Box Vent

- Provides an opening at the bottom of the bag for ventilation
- Ideal for warm summer nights after a long day of exertion

Snag-Free Zipper Tracks

- New innovative Snag Free Zipper Tracks feature prevents the dreaded stuck zipper by creating a barrier between the lining and the zipper track
- Sierra Designs is the first in the market with this advanced anti-snag method

Draft Tube

- Fully insulated tube next to zipper removes cold spots (0° and -20° bags have 2 draft tubes, top and bottom, and draft collar for additional warmth)

Removable Pad Locks

- Attaches bag to sleeping pad to prevent slide off

1/2 Zippers

- A short, steamlined zipper that's used to save weight but still offers easy-in, easy-out access

Baffled Construction

- Keeps the down from migrating
- Increases the ability of down to stick to the baffle material, eliminating cold spots

	Regular	Long
Trail Weight	2 lbs 12 oz	2 lbs 15 oz
Inside Length	78"	84"
