FEATURES

- Removable Pole Sections
- Removable Stash Door
- Shok-Certs
- **DAC** Featherlite Poles SL Poles
- Tent Guard with Ultra Fresh
- CAD Design
- Interlocs
- Clip-Locs
- Swift Clips
- Color-Coded Webbing

INNOVATIONS & FEATURES

Removable Pole Sections with Shok-Certs

- Sierra Designs patent
- Allows removal of pole sections to reduce weight or to convert from 4-season to 3-season mode
- Utilized on our convertible tents

Removable Stash Door

- Rip stop nylon storm door can be removed to reduce weight and pack size

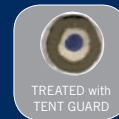

Featherlite Poles

- Lighter with increased strength to weight ratio
- Pole construction without inserts provides a uniform flex and disperses stress evenly

UNTREATED TENT FABRIC

TREATED with TENT GUARD

Tent Guard with Ultra Fresh™

- Sierra Designs rain-fly, floor and footprint are treated with Tent Guard with UltraFresh™. A fungistatic agent that prevents the growth of a range of microorganisms that can cause odors, staining and deterioration. Tent Guard with Ultra-Fresh helps extend the life of our tents by protecting against degradation from fungus, mildew and bacteria that develop when a tent is packed and stored wet.

Computer Aided Design

- A Sierra Designs system of using Computer Aided Design to make technically superior tents
- Allows us to design tents that have a uniform distribution of stress

Interlocs

- Attaches the fly to the tent canopy at each guy point to create one integrated structure for added strength
- Stabilizes tent by distributing the pull to increase strength in heavy weather

SuperSeal Floor

- Combines benefits of catenary and bathtub floors
- Raised, taped, perimeter seam provides guaranteed waterproofness
- Maintains a tighter pitch with a better wind line to prevent flapping

Clip-Locs

- Dynamically locks poles at their intersection
- Add 60% to the tent's strength
- Patented and exclusive to Sierra Designs

Color Coded Webbing

- Guides pole placement for speed and ease of set-up
- Allows for quick orientation of rain fly set up (colored coded on stake loops and on rain fly)
- Constructed of durable, lightweight nylon
