

VOLT

PrimaLoft Sport | Men's

15°F
-9°C

Ultralight

Warm to 15 degrees with PrimaLoft Sport for maximum compressibility, this synthetic ultralight goes from base camp to rock ledges without worrying about a thing.

INNOVATIONS

Jacket Hood

- Reduces the weight of the bag while still keeping the warmth
- Provides a fitted hood for better insulation and decreased heat loss

Foot Box Vent

- Provides an opening at the bottom of the bag for ventilation
- Ideal for warm summer nights after a long day of exertion

Snag-Free Zipper Tracks

- New innovative Snag Free Zipper Tracks feature prevents the dreaded stuck zipper by creating a barrier between the lining and the zipper track
- Sierra Designs is the first in the market with this advanced anti-snag method

Removable Pad Locks

- Attaches bag to sleeping pad to prevent slide off

Draft Tube

- Fully insulated tube next to zipper removes cold spots (0° and -20° bags have 2 draft tubes, top and bottom, and draft collar for additional warmth)

1/2 Zippers

- A short, streamlined zipper that's used to save weight but still offers easy-in, easy-out access

Shingle Construction

- Sierra Designs innovation
- Unique sewing technique that optimizes heat retention in a bag with extra overlap construction in core torso area for added warmth and less weight
- Eliminates cold spots
